**A28. Capital Adequacy (continued)**

(a) The capital adequacy ratios of the Bank (continued):

The total risk-weighted assets of the Bank are computed based on the following approaches:

- (i) Standardised Approach for Credit Risk;
- (ii) Standardised Approach for Market Risk; and
- (iii) Basic Indicator Approach for Operational Risk.

Regulatory capital requirements

The capital adequacy ratios of the Bank are computed in accordance with BNM's Capital Adequacy Frameworks for Islamic Banks on Capital Components and Risk-Weighted Assets. The minimum regulatory capital adequacy ratios before including capital conservation buffer ("CCB") and countercyclical capital buffer ("CCyB") for CET I capital ratio, Tier I capital ratio and total capital ratio are 4.5%, 6.0% and 8.0% respectively.

Banking institutions are also required to maintain a capital conservation buffer of 2.5% and a CCyB above the minimum regulatory capital adequacy ratios. A CCyB is required to be maintained if this buffer is applied by regulators in countries which the Bank has exposures to, determined based on the weighted average of prevailing CCyB rates applied in those jurisdictions. The Bank has applied CCyB on its private sector credit exposures outside Malaysia in line with the respective jurisdictions' requirement to maintain their CCyB. The CCyB is not a requirement for exposures in Malaysia yet but may be applied by regulators in the future.

(b) The breakdown of risk-weighted assets by each major risk category of the Bank is as follows:

	<b>31 March 2023 RM'000</b>	<b>31 December 2022 RM'000</b>
Credit risk	<b>48,933,596</b>	48,034,340
Market risk	<b>86,889</b>	45
Operational risk	<b>2,617,869</b>	2,582,339
	<b><u>51,638,354</u></b>	<b><u>50,616,724</u></b>
